WHAT WE DO

Iter offers customized solutions in financial and strategic areas to small and medium companies. We help organizations to structure financial and accounting controls to smoothly conduct operations and to make smart decisions. Our value proposition is to offer tailored services in accordance with the development stage of business and its management maturity. It is common to seek for specialized support when a startup company faces investment funding and new partners, in order to match a new corporate reality. Iter is ready to assist businesses in this critical period. Our services target entrepreneurs and investors to leverage and speed-up sustainable business growth.

OUR GOAL

We seek partnerships with Investment Funds that operate in the Brazilian startup business environment but do not have a full arrangement to control and follow-up on company's performance. We are prepared to assist in all of the investment phases, as follows:

1 Prospection

We support in the definition of entrepreneurs and projects profiles that will receive capital funding. We conduct business evaluation in the financial area and its related controls (processes and governance).

2 Investment

We partnership with chosen companies in order to support strategic and financial planning through development of financial, accounting and managerial controls.

3 Acceleration

We provide continuous tracking of investees to evaluate if their business conduction is in accordance to achieve the planned goals and milestones. We support route alterations that are necessary in the growth business path.

4 Divestment

We develop financial modeling to valuate business potential and we are competent to collaborate in due diligence process.
